What I wanted to do

Bee's birthday dad box song from Bee and PuppyCat!

Project I ended up going with

- short, rough pose-to-pose and looped animations
- focusing on animation rather than anatomy, etc
- yippee!

Research: pose-to-pose animation

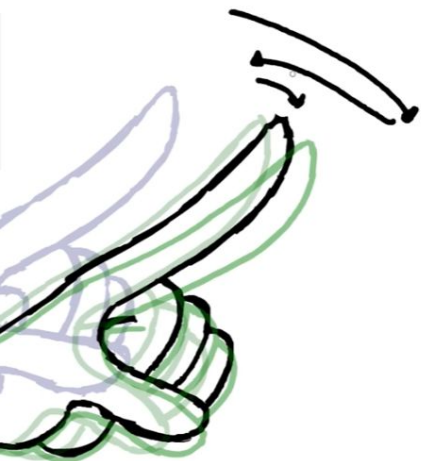

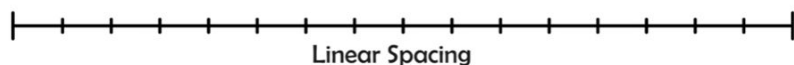

- a movement where the subject moves from one pose to another

Research: principles of animation

Focused on two:

- 1) Easing
- 2) Overshooting

a very helpful video that explains these and more
(also where I got these screenshots from) -->

Actually animating!

1 - cat wagging its tail (easing)

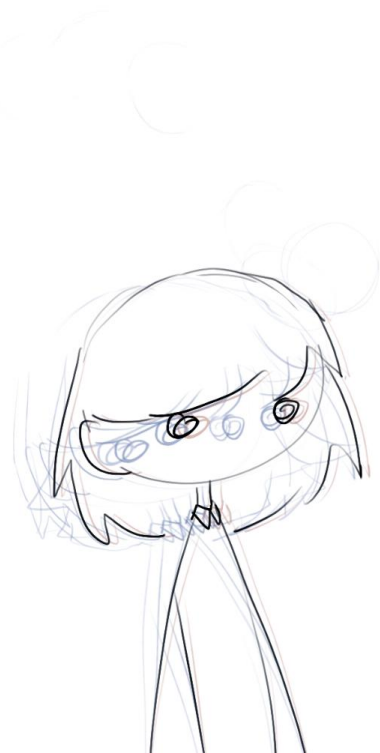

Actually animating!

2 - autism creature (easing)

Actually animating!

3 - bonk! (easing and overshoot)

Final Thoughts + Thank You!
