Finding Your Clay (cont.x3)

-I wouldn't be who I am today without...

... Freestyle Academy. Seriously, this school has unlocked so many of my interests that have shaped what I make.

One significant example is After Effects, which happens to now be my favorite video-editing tool thanks to Freestyle. With this software, I've made my own separate-from-school effect video that is probably around the same quality as my Explorations effect video. (The exploration video may be a bit better actually, since I made that after the other.) Right now, I'm making another personal project video that is definitely even better than the other two; hopefully I can finish it before 2026 ends.

Another example of how Freestyle helped me grow is song production. To be fair, I had done production work before, but I lost interest during sophomore year. However, Freestyle revitalized this passion, to the point that since then, I have created 3 more songs! One thing to note, however, is that I use a different DAW than Freestyle, (a DAW is a Digital Audio Workstation), but even so, the program definitely helped unlock something in me. Plus, whenever I create a video game that needs a soundtrack, I can just make one now. And I have Freestyle to thank for that.

I wouldn't be who I am today without…

…Freestyle Academy. Seriously, this school unlocked so many of my interests that have shaped what I make.

One significant example is After Effects, which happens to now be my favorite video-editting tool thanks to Freestyle. With this software, I've made my own seperate-from-school effect video that is probably around the same quality as my Explorations effect video. (The explorations video may be a bit better actually, since I made that after the other.) Right now, I'm making another personal project video that is definitely even better than the other two; hopefully I can finish it before 2026 ends.

Another example of how Freestyle helped me grow is song production. To be fair, I have done production work before, but I lost interest during sophmore year. However, Freestyle revitalized this passion, to the point that since then, I have created 3 more songs! One thing to note, however, is that I use a different DAW than Freestyle (a DAW is a Digital Audio Workstation), but even so, the program definitely helped unlock something in me (Plus, whenever I create a video game that needs a soundtrack, I can just make one now, and I have Freestyle to thank for that.)
