Plant of Heart

Project: Mug Art Design

Why I chose this: Art on kitchen plates and silverware is something I don't usually see, but art on mugs and cups is what I see most of the time. I happen to know this because inside the kitchen at my house, we have a collection of mugs that include art, but it doesn't exactly mean all of them have art. Sometimes art on objects can be more than just simplicity, so I decided to make it a little bit de-sanitized.

Half of my inspiration for the flowers in my piece of art was inspired by the Demogrogon, a predatory flower-like species from the Netflix series, *Stranger Things*.
