In this dark, satirical comedy, Alexander Mueller is a man accustomed to getting everything he could ever desire: Power and status. A life where consequences are a foreign concept and privilege reigns supreme...

Used to treating women poorly, he wakes up one day to find that societal gender roles have completely reversed. In this altered reality, women now wield the power, forcing Mueller to learn what it's like to navigate through society while facing these inequalities that women face everyday.

Will he emerge from this journey a changed man?

Or continue to relish in the power he previously took for granted?
