Junior Explorations: Music Video

For my film exploration I would like to do a music video. I love watching music videos and making them is something new to me and would be interesting to learn and create. For this project, I will research the process of making music videos, including the pre-production, production, and post-production. For my presentation I plan to make a slideshow that will show my research on the music video process. My final product will be a completed music video and I plan to use a friend of mine who writes and produces music for the song and actress. I don't know which song I want to use yet, but the final project should be around 3 minutes long. To meet the 4 week deadline, I plan to start researching once I get the greenlight and pick my song and plan out the film. I hope to film during week 2.
