

### M Design

#### Stacked Wood Art Design:

I chose to design this stacked wood art piece because I knew that I wanted to create something I could hang up in my room or bring to my college dorm. I was then inspired by the Freestyle Academy letters at the entrance of the Digital Media room. Those letters inspired me to design an M with the inside filled with designs that make me happy. I focused my designs on a flower which represents nature, something I enjoy. Each layer adds to the detail of the flower.
