Common oral retelling: *The Valley of Cats*

Long ago, wildcats lived in a mountain clearing near a volcano.

One day, the volcano the cats thought was dormant erupted.

Soon humans came to the land, and domesticated whatever cats they could find.

After the eruption, the soil became more fertile, and gave perfect conditions for brusselberries to grow.

(Our interpretation of the Valley of the Cats before the Great Eruption)

The Bully and the Student

A bully goes up to a kid and tells them “Give me your brocca!”. The kid has brusselberries in one hand and brocca currency in the other.
