

## “Big Trees Triangle”

### Project Type: Stacked Wood Art

For this project, I want to create my family's A-frame cabin as wood art. The wood texture and layers match the general vibe of the cabin and I think the shape works well. The stacked element can provide depth to the cabin in the windows, beams, roofline, and the trees in the background. This piece of art will be a gift for my dad, since he's been working hard to restore the cabin.
